

In A Democracy,
The Highest Position is "Citizen".

HOW HEMP CAN SAVE THE WORLD

Movie & Presentation, Wed., April 19, 7-9pm

The Underground Café, 3367 Telegraph Road, Ventura

The **Green Party of Ventura County** is proud to present a special educational and entertaining event on one of the most useful and beneficial crops found on the planet today – and the long history of the U.S. government to suppress and demonize its production.

This event will feature a presentation by **Matthew Huijgen**, president and CEO of *HempWorld, Inc.*, following a showing of the 1999 sleeper hit movie,

The Emperor of Hemp, a 60-minute documentary of one man's story to discover the history of hemp in this country; and a shorter 14-minute newsreel, **Hemp for Victory**, a propaganda film made by the U.S. government during World War II to encourage American farmers to grow hemp and which the U.S. government today wants to deny its existence. **Jeff Meyers**, writer and producer of *The Emperor of Hemp*, will introduce the films.

This event comes on the heels of the recent passage by the **California State Assembly of AB 1147**, to **legalize industrial hemp**. This bill is now being considered by the State Senate and may be on the governor's desk before the end of this year.

***** PLEASE JOIN US AND INVITE YOUR FRIENDS! *****

Admission for the event is free. Donations will be accepted to help pay for seating at \$1 per chair. Parking is available on the street or in the rear. For directions and more information, call (805) 746-3472.

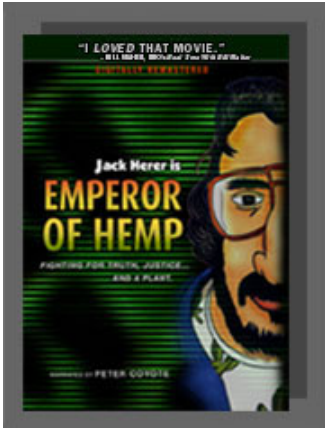

"I LOVED THAT MOVIE." – Bill Maher, HBO's Real Time with Bill Maher

"A SUPER DUPER FILM!" – Dan Skye, High Times
"INSPIRING!" – Paul Krassner, Publisher, The Realist
